

BED AND BREAKFAST?

There are better choices to be made.

5-star laboratory animal feed and bedding from the European leader.

When it comes to specifying diets and bedding, you need to be confident that your supplier can deliver on quality, reliability and a quick turn-round.

With its own research and product development centre and backed by a global nutritional leading company, SAFE offers you all those assurances and more.

Unlike others who also supply zoo and farm diets, SAFE specialises only in laboratory animal diets. Custom-made and 'off-the-shelf' diets are manufactured by SAFE under rigorously controlled conditions in their new, state-of-the-art plant. Every SAFE diet includes baby food ingredients and undergoes 130 quality checks. All SAFE diets are free from food and sanitary cross contamination.

You can also expect the highest standards of quality when you choose SAFE bedding products, all of which are derived from sustainable forests.

Give your animals 5-star accommodation with quality diets and bedding from SAFE.
