- In particular before and after handling animals, or simple manipulations.
- Before and after every contact with animal feed.

Lockable pump. Before use, rotate the pump in the direction of the arrow.
1 press = 3 to 4 ml.

◆ COMMENTS

- Chlorhexidine is a substance with external antiseptic properties with a broad bactericide spectrum. Many preparations containing chlorhexidine are used for local asepsis: wounds, operative fields, mouthwashes, nasal solution and even toothpaste.
- The aqueous formulation of chlorhexidine prevents aggression to the skin.

◆ HOW SUPPLIED

1 litre container with dispensing pump.

Safety data sheet for the product available upon request by fax.
