A03 at 0.2g/kg Doxycycline

Rat & Mouse Diet

Diet Identification :

Code :	U8200P Version 0092
Objective :	Supplemented Diet
Feed Intake :	Rat 10 g/d to 25 g/d, Mouse 3 g/d to 6 g/d.
Form :	Pellet 10-12mm diameter.
Packing :	2 kg bucket, protected by a cardboard box. Possibility to modify on request.
Preservation :	4°C
Lifetime :	6 months
Irradiation :	Possible 10, 25 or 40 Kilograys

Non contractual picture

Ingredients : A03 (Wheat, maize, wheat bran, barley, extruded soybeans, soybean meal, hydrolyzed fish proteins, brewer's yeast, calcium carbonate, pre-mixture of vitamins, pre-mixture of minerals, dicalcium phosphate), water, doxycycline

The hardness of custom diets is generally lower than the standard chow, it's recommended to add TOP BRICKS for proper teeth wear and proper expression of the rodent's behavior.

Updated 04 May 2017

Values are given for information, it is calculated averages. They are indicative and have no contractual value. They are subject to variations related to culture conditions, storage and analytical methods. An analysis of the batch concerned allows validating nutritional values.
