Compressed SAFE compact hay.

Product Objective

SAFE compact hay is very rich in mineral matter, low in crude fiber, which causes an increase in digestibility. Rich in calcium, SAFE compact hay has good magnesium content. It is also rich in sodium which partly explains its appetite. Also, the block has a good sulfur.

SAFE compact hay allows solicit rodent animal instinct as well as chewing fun. It reconciles attractiveness and practicality for the rabbit to the animal technician. Easy to distribute and eliminate.

SAFE compact hay is stable temperature and humidity admitted pet.
