

Photo indicative only

Definition

This bedding is made from selected softwood. The long supple strips of natural wood have been made safe, have had the dust removed, and come from sustainably managed forests. The wood used is natural wood fibers and has not been treated. SAFE® Nesting small helps to improve the animal's environment.

Product Objective

The aim is to provide a simple product that is safe and easy to handle to enhance the animal's environment in compliance with current animal welfare regulations.

SAFE® Nesting small is ideal for building the animal's bed. It also stimulates the animal's play instinct. This product complies with GLP requirements. It encourages the animal to explore and contributes towards its well-being. By improving the animal's environment, it reduces abnormal behaviour such as aggressiveness or apathy. It can be treated in an autoclave.
